## LEARNING WHILE AWAY FROM SCHOOL: RESOURCES FOR TEACHING CHILDREN ABOUT MONEY

March 2020

*Christopher T. Sneed, Assistant Professor*

*Ann A. Berry, Professor*

*Marci Hethmon, Extension Specialist*

*Department of Family and Consumer Sciences*

Your children are out of school. The house is getting crowded, and social distancing has them quite bored.

Just because school is out in response to COVID-19 doesn't mean that learning has to stop. In fact, this could be a great time to teach your children some valuable life lessons, including how to effectively use and manage money. (This is a lesson that research shows will stay with them through their lifetime.)

The resources below are reliable and nonbiased and offer easy-to-use financial education content for any age. Check them out and let the learning continue at home.

**JumpStart Clearinghouse:** A comprehensive online library of financial education resources for teachers, parents and students. You can search by grade level or resource type (video, lesson plans, games, etc.) to find what works best for you and your family!  
[jumpstartclearinghouse.org/resource/search](http://jumpstartclearinghouse.org/resource/search)

**CFPB's Money as You Grow:** Developed by the Consumer Financial Protection Bureau, the lessons in Money as You Grow were based on more than a year of research and drawn from dozens of standards, curricula and academic studies; plus they use easy-to-understand language—effectively meeting you—and your child—where you are! You will find fun age-appropriate activities including a bookshelf listing reading recommendations.

## Learning While Away from School

**NextGen Personal Finance:** NGPF’s mission is to revolutionize the teaching of personal finance in all schools in order to improve the financial lives of the next generation of Americans. They make it easy for teachers (or parents) to engage students by providing ready-to-use curricula including a teaching toolkit. Check out their Arcade for fun online games, interactives and quizzes! [ngpf.org](http://ngpf.org)

**FDIC Money Smart:** This “young people’s” curriculum is innovative and aligns with standards. It can be incorporated into subjects such as English language arts, mathematics and social studies. The curriculum also offers real-life exercises and examples and options for online games that can reinforce understanding. [fdic.gov/consumers/consumer/moneysmart/young.html](http://fdic.gov/consumers/consumer/moneysmart/young.html)

**NEFE’s High School Financial Planning Program:** Got a high schooler? This program “empowers students to map their future.” It has six online modules that teach money management, borrowing, earning power, investing, financial services and insurance. Students will learn how to chart and adjust their route as their values and life circumstances change. Be sure to check out their “For Parents” section for additional at-home activities. [hsfpp.org](http://hsfpp.org)

**MoneySkill:** The course includes the content areas of income, expenses, saving and investing, credit and insurance. The high school and college course is designed to be used as all or part of a course in economics, business, math, social studies or wherever personal finances are taught. Students can access the modules in the classroom, home or wherever an Internet connection is available. Built-in quizzes test students’ grasp of each concept. [afsaeef.org](http://afsaeef.org)
