Supporting Military Families in the Artificial Intelligence Era

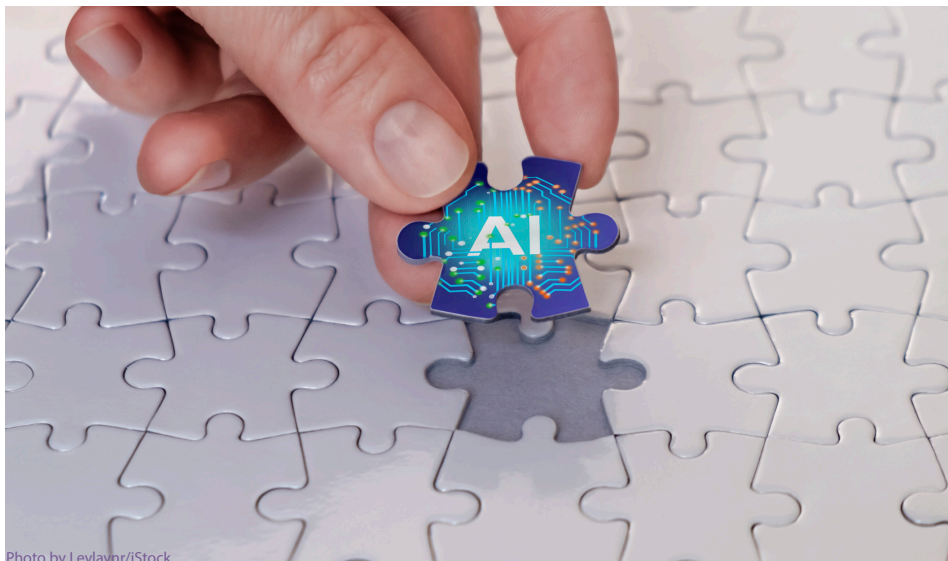

Photo by Leylaynr/iStock

ABOUT THIS WEBINAR:

Artificial Intelligence (AI) can provide valuable assistance to family service providers in various ways, enhancing their ability to offer support and improve outcomes for their clients. Explore AI as a tool for family service providers to increase efficiencies, creativity and engagement in their work with military families. While AI can offer opportunities for family service providers, it should be deployed thoughtfully in order to enhance the relational aspects of service delivery and with workplace policies in mind. In an evolving artificial intelligence landscape, it is essential for family service providers to consider the social impacts for military families including employment and workforce changes, fraud/scams, privacy concerns, and AI bias/discrimination.
