

Drug Trends in Military Adults: Essential Insights for Mental Health Professionals

Photo by Karolina Grabowska from Pexels

ABOUT THIS WEBINAR

This webinar provides a broad overview of the most recent data on emerging drug trends among adult populations in the United States. Topics covered include the status of the opioid/fentanyl epidemic, changes in cocaine and methamphetamine use and consequences, and alcohol and vaping product trends, specifically marijuana and synthetic cannabinoids. Over-the-counter drugs that are currently being sold for recreational use are discussed.

The webinar explores why the military community needs to be aware of the most recent data on drug trends. This session also examines the importance of naloxone and its timely administration in reversing overdose deaths.

PRESENTER

John Haenes, LMSW, ICPS
Chief Operations Officer
Challenge of Tarrant County
Fort Worth, TX
